Meditations and Spiritual Alignment through Crystals and Pendulum

Meditations are the calming of that busy brain, life is too curvy and unsettling at times, these quiet times we can connect again with the universe and our spirit guides and angels who commit themselves to changing lives. Enjoying one's own space is a blessing in surprise as there is so much we do not understand until we are quiet and giving back to ourselves.

Taking the time out

Sound therapy consists of many forms of Spiritual Healing. Negative energies feed off the Goodness, Fairness and all forms of Abundance of happiness. The vibrations from the tuning forks get right into the Chakra Energy Points and make them turn again, like a wheel, turning to spin out the negative vibes, the stale and rotten thoughts of any kind.

With the assistance of a sound healer, you can get your feeling of Spiritual Alignment back through sound healing.

Through meditation the guiding light will flow through your body and linger where it needs to be. There is so much in our spirit that a Sound Healer can know for you, finding the answer with the Pendulum can help make the adjustments and spiritual alignments and re-alignments when and where needed.

Crystal cards, Tarot and Keepers of the Light also work with the Pendulum to assist with making the journey pleasant, safe and support.

The Journey is not the destination, it is a way to be happy and enjoy the Adventure.
